REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the cited prior art because the prior art does not teach, disclose nor make obvious the claimed pet food composition comprising an effective inflammatory response-reducing amount, on a dry matter basis, of omega-6 and omega-3 fatty acids in a weight ratio of about 5:1, wherein the omega-3 fatty acids comprises at least about 80% alpha-linoleic acid derived from flaxseed oil, by weight of the omega-3 fatty acids, and wherein the majority of omega-6 fatty acids are derived from flaxseed oil, said composition comprising from about 7 to about 14% by weight total fat, which composition is formulated as a cat food.

The cited prior art of art, Reinhart (EP 0678247A1) teaches a pet composition comprising omega-6 and omega-3 fatty acids. However, Reinhart teaches the percentage of crude fat employed is 20 to 30% but fails to teach or suggest low levels of dietary fat from about 7% to about 14 % in combination with the criticality of omega-3 or omega-6 fatty acid source at this specific level. The examples in the specification show that flaxseed oil offers a surprisingly better alternative in a lower lipid feline diet (14% or less) because flaxseed oil show minimal immunosuppressive activity compared to fish oil and compared to 22% total lipid diet. There is no motivation to formulate the composition in specified ranges of levels of total fat content with specified ratio of

omega-6 and omega-3 fatty acids without specific teaching or a suggestion from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
